

# Invoke your Human Calculator

**V**edic Math (an ancient Math methodology from India) is the collective name given to a set of sixteen (16) sutras (or formulas) stemming from the Vedic period (from 1500 to 800 B.C). These sutras were originally written in Sanskrit. Vedic Math helps a child understand the numerical concepts of mathematics.

As children learn Vedic Math, they will discover that math problems can be solved with methods other than the ones taught in school. Math is not only about getting the right answers, but also building “number sense”. Furthermore, Vedic Math is a way to develop critical thinking and problem solving skills in your child.

**How does learning Vedic Math supplement a child’s cognitive development?**

- **Improves Attention** – Vedic Math enables students to process calculations mentally.
- **More concentration** – Vedic Math improves visualization ability and spurs creativity.
- **Enhances Memory** – Vedic Math is an absolute mental math system that strengthen the ability to make neural connections enhancing memory.
- **Improves Logic Reasoning** – Vedic Math aids children logically deduce mathematical problems.
- **Processing speed** – Vedic Math improves the time it takes children to process and understand math problems.

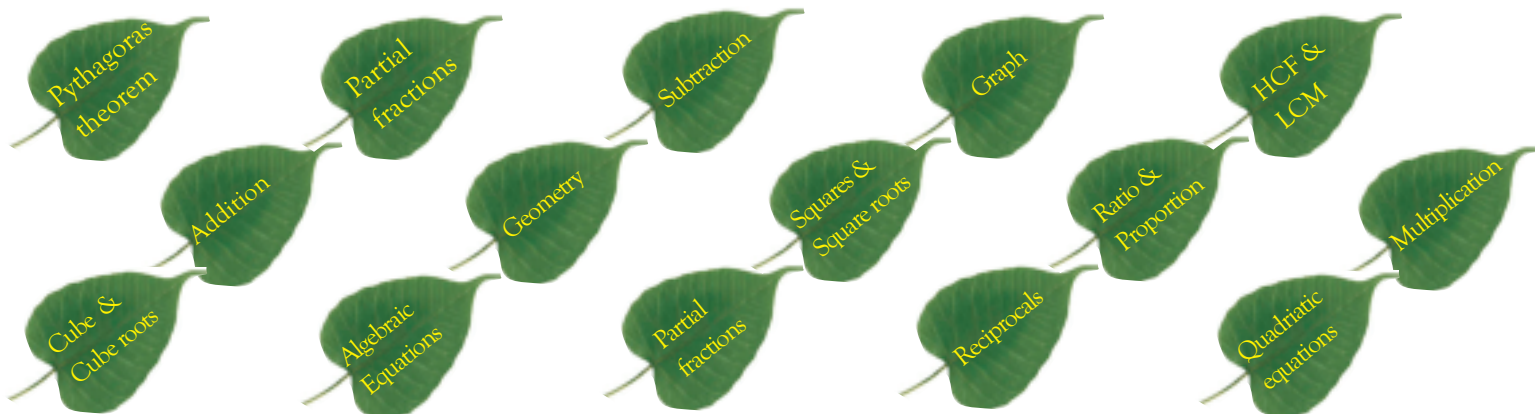

Vedic Mathematics prevents a child from developing math anxiety. Math anxiety starts at a young age for various reasons. If left unattended, math anxiety becomes a mindset that becomes difficult to change.

**Some of the Benefits of Vedic Mathematics**

- **P**romotes efficient computation skills and provides a set of answer for verification procedures for independent cross-checking.
- **R**educes finger counting and scratch work.
- **I**mproves confidence and keeps the mind simulated.
- **D**evelops an interest towards mathematics.
- **E**nriches understanding of math, and enables to see links and continuity between different branches of math.

Maths is like banyan tree with many interconnected trunks & branches — One can climb and explore.

## Our Offerings

- 6 levels (3 intermediate & 3 advanced).
- Providing Online/Offline classes
- Enrollment for Learning Center Licensee (Franchise) Opportunities
